

Remote Alarm Panels

The Remote Alarm Panels are designed to interface with the Titan Products range of alarm integrators.

The RMP incorporates an audible and visual (LED) indication when an alarm is present with a push button to mute the audible alarm. The RMP is built on a single gang plate for flush or surface mounting. The standard plate finish is white with other plate finishes available on request.

Specification

Material:	White plastic single gang plate
Input/Supply:	24V AC / DC or 240V AC
Output:	Buzzer or LED
Power Consumption:	30mA max.
LED Indication:	On "Alarm"
Operating Temperature:	-10 to +40°C
Terminals:	1.0mm recommended 2.5mm max
Dimensions:	82mm high, 80mm wide, 30mm deep
Country of Origin:	UK
Product Code:	See below

Product Codes

Product Code	Product Type
RMP/24	24v supply with delay timer
RMP/240	240v supply with delay timer

Other voltages available on request

Features

- Inputs 24 Volts AC/DC or 240 Volts AC
- Audible alarm is a buzzer 75db @ 1 metre
- LED indication of alarm present
- Optional delay timer adjustable 0 to 30 seconds
- Flush or surface mounting

Connections

RMP/24 & 240 with delay timer for use with AIM Alarm Integrators
