

DND & MUR CORRIDOR PLATE

DND-TOUCH FEATURES

- Perfect partner for in-room RDU-Touch
- Fully capacitive touch screen
- Branding options
- POE type connection for quick and simple install
- Range of finishes available
- Instant visibility on BMS via BACnet communications

The DND-Touch is a stylish touch screen display perfect for hotel corridors. Fully synchronised with the in-room RDU-Touch interface, guest's room requests are instantaneously displayed. A range of finishes are available to suit project requirements including colour matching on surrounds and hotel branding.

The RDU-Touch Hub Multi-drop allows any MUR and DND requests selected on the RDU-Touch to be displayed on the DND-Touch corridor plate.

Each FCU-503 controller can be connected to up to 4 x touch screen user interfaces via the RDU-Touch Hub. This allows multiple RDU-Touch units and a DND-Touch corridor plate to be fully synchronised, offering the guest multiple points within their guest room or suite to adjust their comfort settings.
