

Maximise your building potential

Smart IO Modules and IP Routers

Simplify the complex

At Titan we simplify the complex to help our customers create truly smart spaces promoting wellbeing, comfort, safety and energy efficiency.

Delivering Smart buildings

Through innovation and continuous investment in technology and people, our intelligent control solutions aid the delivery of smart buildings and create connected spaces.

Innovative solutions

Our range of HVAC and smart building products and services provide innovative monitoring & control solutions for residential, education, retail, hospitality and healthcare settings.

Smart IO Modules

Designed to provide a **small footprint** within a panel, our compact modules provide **additional** and **cost effective** networkable device points to a **BACnet MS/TP or Modbus** network.

Native BACnet MS/TP and Modbus RTU communications

Flexible Universal Inputs

Analogue, Digital or Relay outputs

Compact size

NFC commissioning app

IO/COM

The Smarter Setup

At Titan we are passionate about using technology to improve the user experience of our customers.

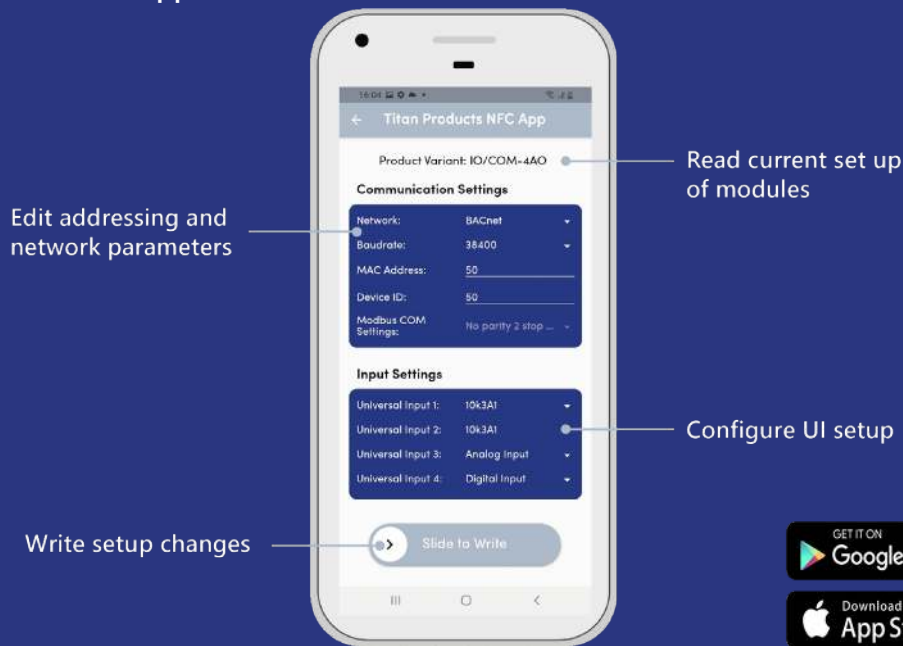

Quick, simple, secure:

As easy as making contactless payments, the use of NFC technology provides a quick, simple and secure setup which can be completed in seconds, with or without power to the IO modules.

Near Field Communication:

With native NFC communications built into the modules, the only devices required for set up are the IO modules and your smart phone.

Our intuitive app:

Maximising network potential

We recognise device connectivity, interoperability and communications speed as key in achieving a truly smart building.

IP Networking

Through high speed BACnet communications and intuitive embedded web page setup, we offer seamless integration to your building IP networks.

NetMaster BACnet router

The NetMaster router allows peripheral BACnet MS/TP devices, such as our I/O modules, to be fully integrated with BACnet/IP networks.

TP-NM-D

Our Smart Solution range also includes:

Application Specific Controllers

Smart Room and Plant Sensors

Smart Room Setpoint Adjuster with Control

Contact the sales team for more information on any of our Smart Solutions.
